

ABSTRACT OF THE INVENTION

1
2 Apparatus for aiding in the identification of tissue
3 type for an anomalous tissue in an impedance image
4 comprising:
5 [means for providing a polychromatic immittance map of a
6 portion of the body;
7 [means for determining a plurality of polychromatic
8 measures from one or both of a portion of the body; and
9 a display which displays an indication based on [said
10 plurality of polychromatic measures.
